About Viwors

Viwors is a professional manufacturer of animal feed additives and nutrition solutions from China. We supply vitamin premixes, growth promoters, mycotoxin binders, gut health boosters and functional feed additives to importers, distributors, feed mills and integrators across Africa, the Middle East and South Asia — with consistent formulation, stable quality and reliable export service.

Certifications & Quality

- GMP Standard Production — Feed additive production under GMP standard, batch-tested in our quality control laboratory.
- ISO 22000 — Food safety management across the production chain.
- FAMI-QS — Feed additive quality system for the feed chain.
- EU CE Certification — Products carry EU conformity certification (CE marking).

Why Viwors

- Custom formulas — Premix specifications, dosage forms and private-label packaging developed around your market.
- Batch traceability — Every batch ships with a Certificate of Analysis; every tonne traceable to raw material lots.
- Export support — Full export documentation, on-time delivery and after-sales technical support.

Products In This Catalog (38)

- 1. Mycotoxin Binder** — Broad-spectrum protection against feed mycotoxins
 - 2. Growth Promoter** — Supports daily gain and feed conversion efficiency
 - 3. Vitamin Premix** — Balanced vitamins for immunity and productivity
 - 4. Gut Health Booster** — Probiotic support for digestive balance
 - 5. Vitamin Growth Booster** — Essential vitamins and multi-minerals for faster development and stronger immunity
 - 6. Amino Acid** — Essential amino acids for protein utilization
 - 7. Poultry Premix** — Concentrated vitamin-mineral premix with A/D3/E, selenium and amino acids. Mixing ratio 1:100.
 - 8. Swine Premix** — Vitamin-mineral premix for pigs — A/E/B1/B12/D3 with Zn, Se, Fe, Cu and Mn. Mixing ratio 1:100.
 - 9. Ruminant Premix** — Vitamin-mineral premix for cattle and sheep with Fe, Se, Cu, Zn, Mg, P and Ca. Mixing ratio 1:100.
 - 10. Poultry Vita-Solv** — Water-soluble vitamin powder — 100 g mixes 100 L of drinking water.
 - 11. AD3E-Solv** — Vitamin AD3E soluble powder — 100 g mixes 100 L of drinking water.
 - 12. C-Protect** — Vitamin C soluble powder for poultry — heat stress relief.
- ... and 26 more products in the full catalog.

Mycotoxin Binder

Broad-spectrum protection against feed mycotoxins

Key Benefits

- Binds aflatoxins, zearalenone, ochratoxin and fumonisins in the digestive tract
- Protects liver, kidney and intestinal health under challenging storage climates

Species: Poultry, swine, ruminants, aquaculture | Form: Powder for in-feed use

Recommended inclusion depends on raw material risk. Typical use levels range from 1–3 kg per tonne of complete feed; higher levels are advised when...

Growth Promoter

Supports daily gain and feed conversion efficiency

Key Benefits

- Supports daily weight gain and feed conversion ratio
- Improves nutrient utilization and protein deposition

Species: Poultry and swine | Form: Powder for in-feed use

Blend evenly into the complete feed before pelleting or feeding. Inclusion levels are adjusted to the species, age group and performance goal;...

Vitamin Premix

Balanced vitamins for immunity and productivity

Key Benefits

- Complete vitamin coverage for immunity, bone development and egg or milk production
- Custom formulas matched to species, age and local raw material profiles

Species: Poultry, swine and ruminants | Form: Powder premix for in-feed use

Dilute according to the formula specification and mix evenly into the complete feed. Custom premix formulations are developed for importers and feed...

Gut Health Booster

Probiotic support for digestive balance

Key Benefits

- Supports a balanced intestinal microflora
- Reduces the risk of diarrhea and digestive disturbance

Species: Poultry and swine | Form: Powder for in-feed or water use

Add to feed during mixing or use in drinking water according to the program. It is especially useful around feed changes, after antibiotic-free...

Vitamin Growth Booster

Essential vitamins and multi-minerals for faster development and stronger immunity

Key Benefits

- Supplies essential vitamins A, D3 and E together with multi-minerals
- Supports faster development and stronger immunity in chickens

Species: Poultry (broilers and layers) | Form: Powder supplement for in-feed use

Mix evenly into the feed at the recommended rate for the age and production goal. Use during growth phases and stress periods such as vaccination,...

Amino Acid

Essential amino acids for protein utilization

Key Benefits

- Supplies essential amino acids that balance low-protein diets
- Improves protein utilization and carcass quality

Species: Poultry, swine and aquaculture | Form: Powder or crystalline amino acid for in-feed use

Formulated into the diet to balance the amino acid profile of the available raw materials. Feed mills use it to reduce crude protein while...

Poultry Premix

Concentrated vitamin-mineral premix with A/D3/E, selenium and amino acids. Mixing ratio 1:100.

Key Benefits

- Balanced vitamins A, D3 and E with selenium and amino acids for broilers and layers
- Simple 1:100 mixing ratio suits feed mills, integrators and larger farms

Species: Poultry (broilers and layers) | Form: Powder premix for in-feed use

Mix at 1:100 into the complete feed — 1 kg of premix per 100 kg of feed. Blend evenly before pelleting or feeding. Store in a cool, dry place in the...

Swine Premix

Vitamin-mineral premix for pigs — A/E/B1/B12/D3 with Zn, Se, Fe, Cu and Mn. Mixing ratio 1:100.

Key Benefits

- Vitamins A, E, B1, B12 and D3 with zinc, selenium, iron, copper and manganese
- Supports piglet growth, sow reproduction and grower performance

Species: Swine (piglets, growers, sows) | Form: Powder premix for in-feed use

Mix at 1:100 into the complete feed — 1 kg of premix per 100 kg of feed. Blend evenly before feeding. Store dry and cool; use within 12 months of...

Ruminant Premix

Vitamin-mineral premix for cattle and sheep with Fe, Se, Cu, Zn, Mg, P and Ca. Mixing ratio 1:100.

Key Benefits

- Iron, selenium, copper, zinc, magnesium, phosphorus and calcium in one premix
- Supports dairy milk yield, beef gain and sheep flock performance

Species: Cattle and sheep (dairy, beef, sheep) | Form: Powder premix for in-feed use

Mix at 1:100 into the compound feed or total mixed ration — 1 kg of premix per 100 kg of feed. Blend evenly; store in dry, cool conditions.

Poultry Vita-Solv

Water-soluble vitamin powder — 100 g mixes 100 L of drinking water.

Key Benefits

- Water-soluble vitamins for poultry drinking water programs
- Simple dosing: 100 g per 100 L of drinking water

Species: Poultry (broilers and layers) | Form: Soluble powder for drinking water

Dissolve 100 g in 100 L of clean drinking water and provide fresh each day. Use during stress periods, vaccination, heat or recovery for best results.

AD3E-Solv

Vitamin AD3E soluble powder — 100 g mixes 100 L of drinking water.

Key Benefits

- Vitamins A, D3 and E in one water-soluble powder
- 100 g per 100 L drinking water dosing

Species: Poultry (broilers and layers) | Form: Soluble powder for drinking water

Dissolve 100 g in 100 L of drinking water. Use 2-3 consecutive days during stress, vaccination or recovery; consult our technical team for specific...

C-Protect

Vitamin C soluble powder for poultry — heat stress relief.

Key Benefits

- Vitamin C supplementation for heat stress relief
- Water-soluble powder: simple drinking water application

Species: Poultry (broilers and layers) | Form: Soluble powder for drinking water

Dissolve in clean drinking water and provide fresh daily during heat stress periods. Follow the label dosage; adjust with our technical team for your...

VITA-LIQ

Liquid multivitamin with amino acids and electrolytes for poultry. Dosage 1 ml per 2 L water.

Key Benefits

- Liquid multivitamin with amino acids and electrolytes
- Simple dosing: 1 ml per 2 L of drinking water

Species: Poultry (broilers and layers) | Form: Liquid for drinking water

Add 1 ml per 2 L of drinking water. Provide fresh daily during stress, vaccination, heat or recovery periods. Shake well before use.

RUMI-LIQ

Liquid multivitamin for cattle and sheep. Dosage 1 ml per 2 L water.

Key Benefits

- Liquid multivitamin formulated for cattle and sheep
- 1 ml per 2 L water dosing

Species: Cattle and sheep | Form: Liquid for drinking water or drench

Add 1 ml per 2 L of drinking water, or as directed by your vet for drenching. Use during stress, transport, calving or recovery periods.

Poultry Amino-Grow

Amino acid supplement — faster growth, better feed conversion, lean muscle development.

Key Benefits

- Amino acid supplementation for growth and feed conversion
- Supports lean muscle development in broilers

Species: Poultry (broilers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate for the age and performance goal. Use during grower and finisher phases for best response.

AQUA+

Bacillus water clarifier for aquaculture — pond and sludge treatment.

Key Benefits

- Bacillus-based water clarifier for ponds and tanks
- Supports sludge breakdown and water quality

Species: Shrimp and fish (pond and tank systems) | Form: Powder for water application

Apply to pond water according to the program — typical use supports sludge decomposition and water clarity. Confirm timing and rate with our...

Piglet Gut Acidifier

Gut acidifier for piglets — supports gut health and improves performance.

Key Benefits

- Organic acid support for piglet gut health
- Helps maintain stable digestion during weaning

Species: Swine (piglets) | Form: Powder for in-feed use

Blend evenly into the creep or starter feed at the recommended rate. Use from pre-weaning through the post-weaning period for best results.

CHELAMIN

Amino acid chelated trace elements — Fe, Zn, Mn, Cu in liquid form with high absorption.

Key Benefits

- Amino acid chelated iron, zinc, manganese and copper
- Liquid form with high absorption rates

Species: Poultry, swine and ruminants | Form: Liquid for water or feed application

Administer through drinking water or blend into feed at the recommended rate. Confirm dosing with our technical team for your species and stage.

EGG+

Trace mineral premix for laying hens — egg quality and bone density.

Key Benefits

- Trace minerals targeted at egg quality
- Supports shell strength and bone density in layers

Species: Poultry (laying hens) | Form: Powder premix for in-feed use

Blend evenly into the layer feed at the recommended rate. Use through peak lay and late lay periods to protect egg quality and bone reserves.

EQUI-MIN

Compound mineral premix for horses — bone strength, muscle function, electrolyte balance.

Key Benefits

- Compound mineral premix formulated for horses
- Supports bone strength and muscle function

Species: Horses (performance, breeding, leisure) | Form: Powder premix for in-feed use

Blend into the daily feed at the recommended rate. Adjust for workload, age and breeding status with our technical team.

CALBOOST

Calcium supplement — calcium gluconate plus calcium lactate for stronger bones and shells.

Key Benefits

- Calcium gluconate plus calcium lactate for high availability
- Supports stronger eggshells in layers

Species: Poultry (layers) and ruminants | Form: Powder for in-feed or water use

Add to feed or drinking water at the recommended rate. Use during peak lay, shell quality issues or recovery periods.

Swine Myco-Bind

Mycotoxin binder for pigs — toxin binding protection for sow and grower diets.

Key Benefits

- Mycotoxin binding protection for sow and grower diets
- Supports reproduction, feed intake and herd health

Species: Swine (sows, growers, finishers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Increase the rate when high-risk raw materials or visible mold are present.

Pig Growth Promoter

Faster weight gain, better feed efficiency, healthier pigs.

Key Benefits

- Supports faster weight gain in growers and finishers
- Improves feed efficiency and nutrient utilization

Species: Swine (growers and finishers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Use through grower and finisher phases for the best response.

AQUA-GROW

Growth promoter for catfish and tilapia — protein enriched with immune boost.

Key Benefits

- Growth promoter formulated for catfish and tilapia
- Protein-enriched formula with immune support

Species: Catfish and tilapia | Form: Powder for in-feed use

Blend evenly into the fish feed at the recommended rate. Use through grow-out phases for better weight gain and survival.

SHRIMP-GROW

Growth promoter for all shrimp — protein-rich and mineral fortified.

Key Benefits

- Growth promoter for shrimp of all stages
- Protein-rich, mineral-fortified formula

Species: Shrimp (all species and stages) | Form: Powder for in-feed use

Blend evenly into the shrimp feed at the recommended rate. Use through the grow-out cycle to support molting and steady growth.

MUSCLE+

Beef cattle growth additive — lean muscle and fat trim.

Key Benefits

- Growth additive for beef cattle finishing
- Supports lean muscle deposition and fat trim

Species: Beef cattle | Form: Powder for in-feed use

Blend evenly into the finishing ration at the recommended rate. Use through the finishing phase for carcass quality gains.

LEAN+

Pig growth additive — muscle growth with fat reduction.

Key Benefits

- Supports muscle growth with fat reduction in pigs
- Improves carcass leanness and feed efficiency

Species: Swine (growers and finishers) | Form: Powder for in-feed use

Blend evenly into the finisher feed at the recommended rate. Use through the finishing phase for leaner carcasses.

RUMEN+

Rumen digestion and fast growth promoter for cattle.

Key Benefits

- Supports rumen digestion and feed efficiency
- Promotes faster growth in cattle

Species: Cattle (beef and dairy) | Form: Powder for in-feed use

Blend evenly into the compound feed or TMR at the recommended rate. Use through growing or lactation phases for best response.

FAST+

Aqua feed attractant and growth booster — taurine and vitamins for early harvest.

Key Benefits

- Feed attractant plus growth boost for aquaculture
- Taurine and vitamins support early harvest

Species: Fish and shrimp | Form: Powder for in-feed use

Blend evenly into the aqua feed at the recommended rate. Use through grow-out phases to support intake and early harvest.

Essential Oil Blend

Natural plant essential oils — natural protection and better performance.

Key Benefits

- Natural plant essential oils for feed programs
- Supports digestive health and natural protection

Species: Poultry and swine | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Use continuously or around stress periods as part of the nutrition program.

Egg Production Booster

More eggs, larger size, stronger shells for laying hens.

Key Benefits

- Supports egg number, size and shell strength
- Targeted nutrients for peak lay performance

Species: Poultry (laying hens) | Form: Powder for in-feed use

Blend evenly into the layer feed at the recommended rate. Use through peak lay and when shell quality declines.

Rumen Booster

Liquid rumen enhancer — improves digestion, feed efficiency and milk yield.

Key Benefits

- Liquid rumen enhancer for cattle and sheep
- Supports digestion, feed efficiency and milk yield

Species: Cattle and sheep | Form: Liquid for water or drench use

Administer through drinking water or as an oral drench at the recommended rate. Use around calving, peak lactation or recovery periods.

GROW+

Vitamin B complex and amino acids for cattle and sheep.

Key Benefits

- Vitamin B complex with amino acids for cattle and sheep
- Supports appetite, growth and recovery

Species: Cattle and sheep | Form: Powder for in-feed use

Blend evenly into the compound feed or TMR at the recommended rate. Use during growing, stress or recovery periods.

Poultry Vitamin Oral Liquid

Liquid vitamin supplement for poultry — fast absorption through drinking water.

Key Benefits

- Liquid vitamins for drinking water programs
- Fast absorption, ideal for stress and recovery periods

Species: Poultry (broilers and layers) | Form: Liquid for drinking water

Add to clean drinking water at the recommended rate and provide fresh daily. Use during stress, vaccination, heat waves and recovery periods for best...

Poultry Enzyme Complex

Multi-enzyme complex — NSP enzymes improve feed digestion and nutrient utilization.

Key Benefits

- NSP enzymes break down non-starch polysaccharides in corn and soybean diets
- Improves nutrient digestibility and feed conversion

Species: Poultry (broilers and layers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Use continuously for consistent digestion benefits across the production cycle.

Poultry Gut Conditioner

Gut health conditioner for poultry — supports digestive balance and flock performance.

Key Benefits

- Supports a balanced digestive environment in poultry
- Helps maintain consistent droppings and feed intake

Species: Poultry (broilers and layers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Use around feed changes, heat stress and recovery periods for best results.

Poultry Mycotoxin Binder

Mycotoxin binder for poultry — protects broilers and layers from feed mycotoxins.

Key Benefits

- Broad-spectrum adsorption of aflatoxins, zearalenone, ochratoxin and fumonisins
- Protects liver, kidney and intestinal health in poultry

Species: Poultry (broilers and layers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Increase the rate when high-risk raw materials or visible mold are present; confirm with...

Poultry Growth Promoter

Growth promoter for broilers — faster daily gain and better feed conversion.

Key Benefits

- Supports daily weight gain in broilers
- Improves feed conversion and nutrient utilization

Species: Poultry (broilers) | Form: Powder for in-feed use

Blend evenly into the complete feed at the recommended rate. Use through grower and finisher phases for the best response.

OEM & Private Label Solutions

Your brand, our production — private-label feed additives developed, packed and delivered under your name. From custom premix formulas to your own packaging design, we support the full journey from sample to container.

01**Formula Development**

Your target species, dosage and performance goals become a custom feed additive formula, locked with you before production.

02**Packaging Design**

Private-label bags, pouches and labeling designed to your brand standards.

03**Custom Production**

GMP-standard batch production with strict raw-material and finished-goods testing.

04**Global Delivery**

Export documentation, shipping coordination and after-sales technical support.

Start Your OEM Project

Samples, technical datasheets and COA documents available on request. MOQ from 25 kg bags upward; better pricing for full containers.

Contact Our Export Team

Company

Zhengzhou Viwors Biotechnology Co., Ltd.

How We Work Together

- 1. Inquiry — Send your spec sheet or tell us the species, target performance and local raw materials.
- 2. Quotation — A commercial proposal with MOQ, price and lead time — typically within one business day.
- 3. Sample & Confirmation — Pre-shipment samples with COA; formulation locked before production begins.
- 4. Production & Delivery — Batch-traceable production, export documents, shipment tracking and after-sales support.
